

# **Mitochondrial disease in everyday clinical child neurology praxis.**

**Clinical course for trainees in child neurology sponsored by the Nordic Neuropediatric Society.**

**Time: June 4-5 2009.**

**Venue: Ågrenska villan, Högåsplatsen 2, Göteborg**

Who should attend: Trainees in child neurology from the Nordic countries. Max. 20 participants.

Topics: The biochemical, morphological and genetic background of mitochondrial disease. The most common mitochondrial encephalomyopathic syndromes, the most common neurologic symptoms, signs and neuroradiologic features found in children and adolescents with mitochondrial disease. When should we suspect mitochondrial disease. How do we treat patients with mitochondrial disease.

The participants are encouraged to submit and present a case of suspected or verified mitochondrial disease.

Language: English.

Faculty: Helena Pihko, Leena Valanne, Pirjo Isohanni, Tuula Lönnqvist from the University of Helsinki. Anders Oldfors, Elisabeth Holme, Már Tulinius, and Niklas Darin from the University of Göteborg. Elsebeth Östergaard from the University of Copenhagen.

The course will be held at the Ågrenska Villan, Högåsplatsen 2 which is located in the center of Göteborg. A list of hotels will be forwarded to participants.

Registration Fee: 2800,- SEK.  
Hotel accommodation is not included.

The course is sponsored by the Nordic Neuropediatric Society.
